

Battle River School Division

Early Learning Framework Overview

We believe children are mighty learners, full of a sense of wonder who, in a holistic play-based environment will seek, participate, persist and care. Through relationships with family, community partners and peers, children increase their knowledge, acquire new skills, and practice what they have learned across environments.

Early Literacy and Numeracy

Your child will be immersed in a literacy and numeracy rich environment to nurture an appreciation of written and oral language, creative expression, problem solving, patterns, and number sense.

Physical Skills and Wellbeing

Your child will participate in a variety of gross motor and fine motor activities designed to increase body awareness and physical skill development used in everyday life. Exploration of choices for healthy living are promoted in a safe, playful and encouraging environment.

Citizenship, Community and Culture

Your child will be a member of a diverse community of learners in which uniqueness and belonging of all is celebrated and appreciated. Personal and social responsibility will be fostered through exploration of the learning environment and connection with others.

Personal and Social Development

Your child's emotional wellbeing will be nurtured in a safe environment that promotes a healthy self-image. Your child will be encouraged to attempt new things, take risks, and explore ways to express feelings and solve problems in a positive way.
